

## No DEE paths (single path execution)

## First Come - First Serve DEE path management

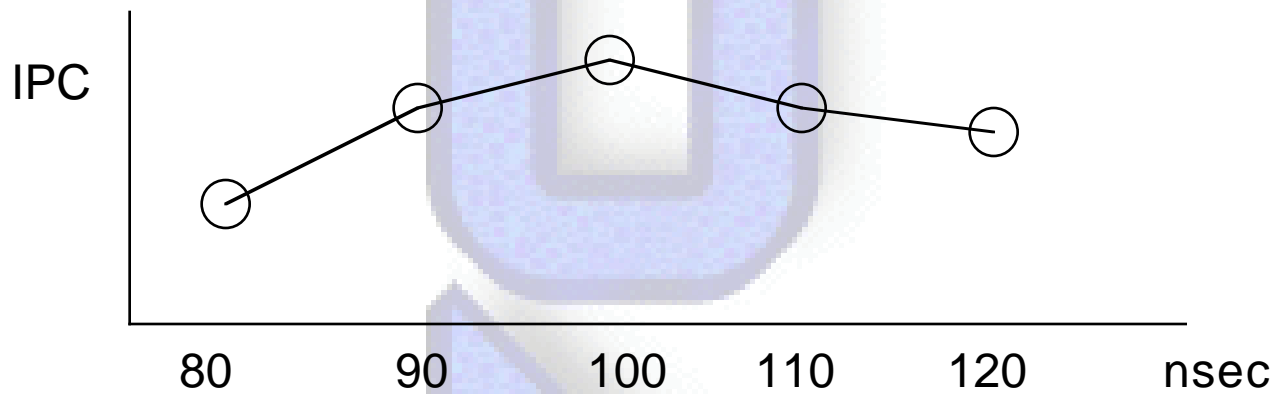

## release DEE path management

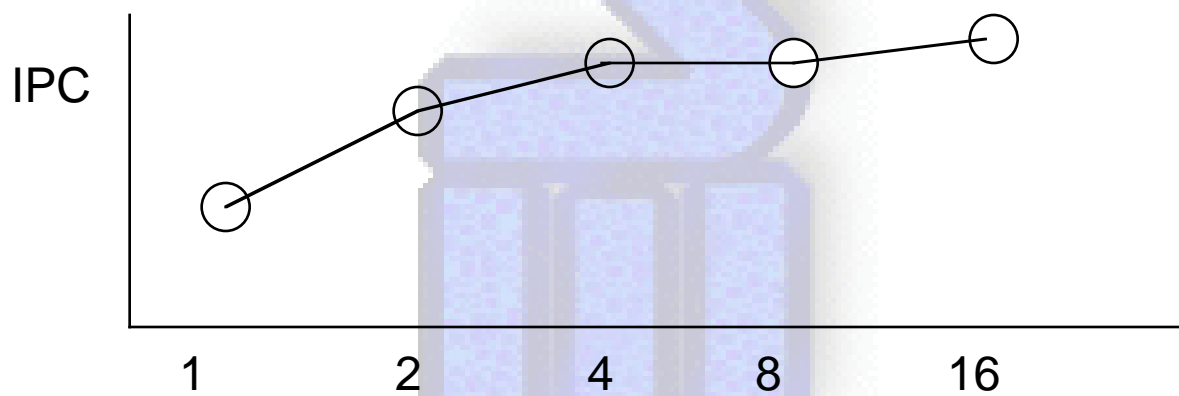

# Memory Sensitivity Study

All IPC numbers are given as the harmonic mean across all give benchmark programs. All data is for the machine configuration 32-8-16-16.

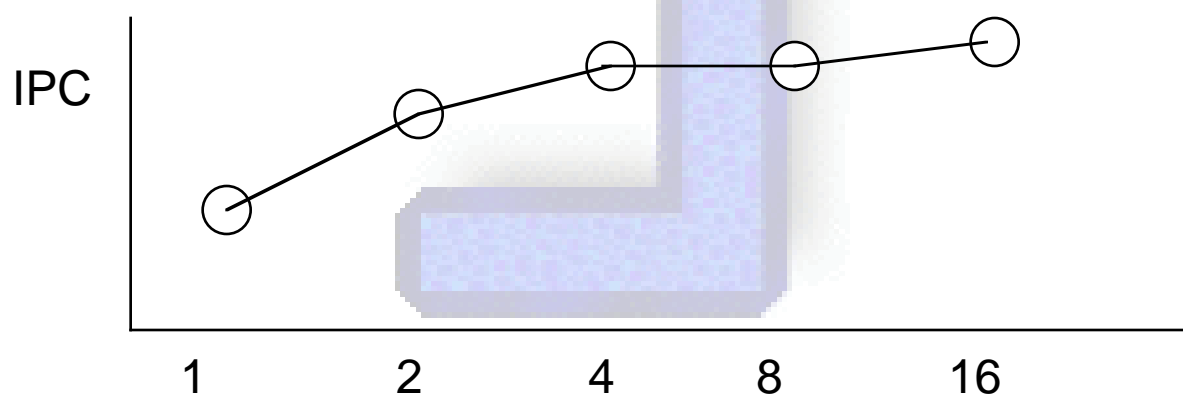

## Main Memory Latency

## Address Interleave Factor

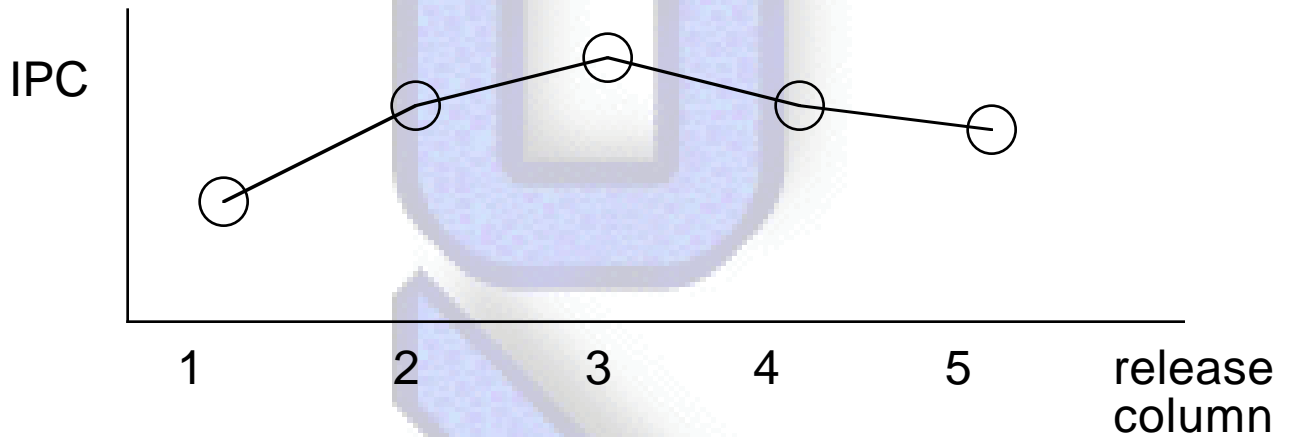

## L1 Data Cache Associativity

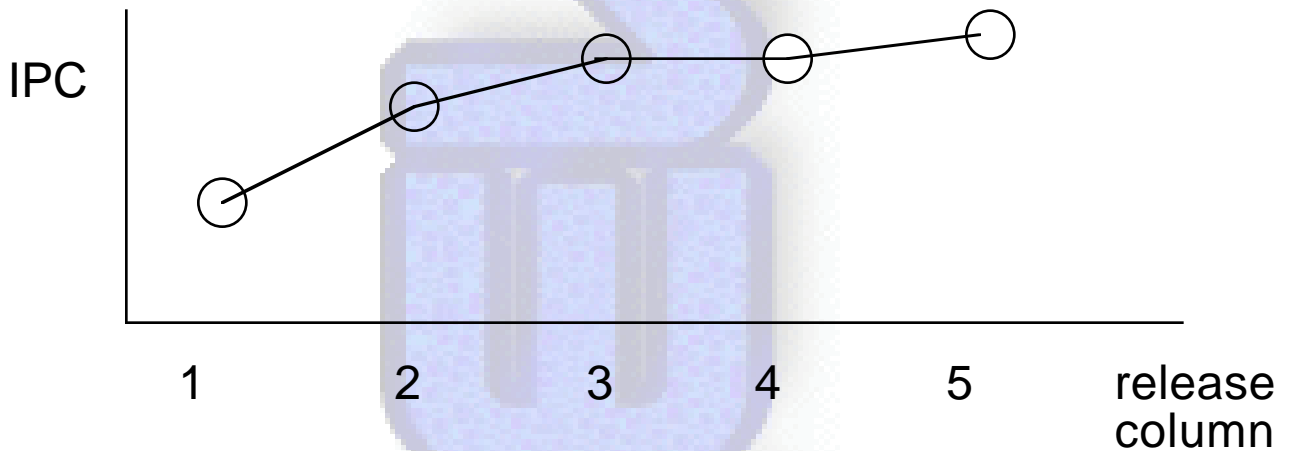

# Release Column Sensitivity Study

All IPC numbers are given as the harmonic mean across all five benchmark programs. Data for three machine geometries are shown,.
